

## **AMENDMENTS**

**Amendments to the Figures: None.**

**Amendments to the Specification:**

Please cancel the amendment to the specification on page 3, lines 7-14 presented in the Amendment and Response to Office Action filed on January 11, 2007. Or in the alternative, the following amendment can be entered to remove the earlier amendment. Page 3, second paragraph.

The hardware needed to transmit inter-program module communications is standard computer networking hardware which utilizes standard network protocols, e.g., ISO/OSI, IPX, SNA, OTMA, APPC, TCP/IP, to pass messages from one program module to the other. In addition, each computer on the network needs a network card capable of communicating across the network medium. The network medium may be Ethernet, token-ring, twisted pair, infrared, radio waves, other wireless mediums and the like. The network may be a local area network LAN, wide area network WAN, or global network such as the Internet.
